

Arsenal's Emirates Stadium

Arsenal signs up for another 5 years with displayLED.

LED screen supplier and provider of LED display services, displayLED is delighted to renew its contract for maintenance and match day support with Arsenal.

Since the installation of Arsenal's LED displays throughout the spectacular stadium, the displayLED technical team has been providing maintenance, installation services and match day support.

The two Mitsubishi DiamondVision LED screens measuring 12m wide by 6m high are positioned in the north-west and south-east corners of the new stadium's upper tier. The screens show pre-match programmes, player and team information, advertising and action replays. The displayLED technical team ensures that the screens are maintained to their highest standards for every match.

Likewise, the EBEL clocks, installed at the half way line on both sides of the stadium displaying EBEL logo and timings, are serviced and maintained regularly by the displayLED team.

The displayLED team was instrumental in the decision making process for the purchase and installation of the two Mitsubishi DiamondVision LED screens, the 260m long LED perimeter advertising boards and the two Ebel LED clocks within the stadium. Representing the interests of several leading LED manufacturers, displayLED worked closely with Arsenal's project managers AYH to arrange 'shoot outs' and product comparisons to determine the most suitable solutions for the club's pitch side requirements.

"We are delighted that Arsenal has renewed its contract with us," says displayLED founder Graham Burgess. "It is acknowledgement that our maintenance team continue to provide the best service at the highest standards. Needless to say, we are very proud to have been involved with Arsenal once again."

About displayLED

The displayLED team are independent specialists in the giant video screen industry.

With operations in London, Hong Kong and Sydney and a US facility to open in 2007, the company's main focus is on supplying the sports and rental markets plus specialist "marquee" displays such as the installation for Coca Cola in Piccadilly Circus and Reuters in London's Docklands.

The people behind displayLED are some of the most experienced in the business. Its highly skilled team has a great track record and is in the unique position to offer specialist advice and turnkey solutions for any large display project, at competitive prices.
